

Letter from the Editors

Welcome to another issue of *Edentata*! *Edentata* 20 includes one full article, four short communications, two field notes, and a News section packed with interesting announcements. If you use camera traps for your research, make sure to have a look at the first article, which provides guidelines to individually identify giant armadillos. The short communications include new records of two poorly known species, *Cabassous centralis* in Guatemala and *Dasypus pilosus* in Peru. Two contributions deal with behavioral observations, agonistic behavior among *Bradypus variegatus* and non-agonistic encounters of wild *Myrmecophaga tridactyla*. Unusual coloring patterns are described in two contributions, one about leucism in *Bradypus variegatus* and the other about an albino *Tamandua tetradactyla*.

We're very happy to inform you that our Specialist Group has received a grant from the Species Survival Commission, which allowed us to completely re-design our website www.xenarthrans.org and publish this year's issue of *Edentata*. You will find additional information on the grant, a summary of a new article on maned sloths, and activities of some of our Specialist Group members in the News section. We are especially proud of our member Sergio Vizcaíno, who received the Outstanding Career Award from the Argentine Society for the Study of Mammals (SAREM). Congratulations, Sergio!

More good news: we have a new Specialist Group member! Rachel Hoffmann was a key member of the SSC Office for 10 years and has been of fundamental help to many Specialist Groups, including the Anteater, Sloth and Armadillo Specialist Group. We're thrilled that she will be supporting us in an advisory role on administrative issues. Thanks for accepting, Rach!

We'd like to give a warm welcome to Alessandra Bertassoni, who has joined the *Edentata* team as editorial assistant. Welcome to the team, Ale!

Last, but not least, we would like to thank all anonymous reviewers for their excellent work!

IUCN SSC Anteater, Sloth and Armadillo Specialist Group Members 2017–2020

Chair

Mariella Superina, Dr.med.vet., Ph.D. in
Conservation Biology
Research Scientist CONICET
Associate Researcher Fundación Omacha
IMBECU, CCT CONICET Mendoza
Casilla de Correos 855
Mendoza (5500)
Argentina
E-mail: mariella@superina.ch

Deputy Chair

Nádia de Moraes-Barros, Ph.D. in Biology
(Genetics)
Auxiliary Researcher
CiBIO – Centro de Investigação em
Biodiversidade e Recursos Genéticos/InBIO
Laboratório Associado
Universidade do Porto
Campus Agrário de Vairão
Rua Padre Armando Quintas
4485-661 Vairão
Portugal
